

Muhammad Dawood Rizwan

Senior AI Engineer

✉ dawooddogar26@gmail.com ☎ +92 3364422994 📍 Pakistan. 🔗 [Linkdin](#)

Summary

AI Researcher with experience at NUST SEECS delivering funded research and industry-driven AI solutions across Remote Sensing, Healthcare, and Education. Skilled in building end-to-end intelligent systems using Large Language Models, Generative AI, and modern ML frameworks, with strong expertise in Python, deep learning, and scalable backend development. Passionate about translating research into production-ready applications through data-driven problem solving and robust system design.

Experiences

04/2026 – Present	Senior AI Engineer, <i>National University of Sciences and Technology (NUST SEECS)</i>	Pakistan
03/2025 – Present	AI Researcher, <i>Machine Vision & Intelligent Systems Lab</i>	Pakistan
10/2024 – 01/2025	Trainee Data Science and AI, <i>Descon</i>	Pakistan
07/2024 – 10/2024	AI Engineering, <i>Kryptomind LLC</i>	Pakistan

Education & Fellowship

12/2020 – 07/2024	Bachelor of Information Technology, <i>Punjab university college of information Technology (PUCIT)</i>	Pakistan
06/2025 – 07/2025	DAAD Fully Funded Research Visit, <i>RPTU TU Kaiserslautern, Germany</i>	Germany

Skills

AI & Machine Learning

LLMs, LangChain, CrewAI, n8n, AI agents, RAG, Transformers, Prompt Engineering, Generative AI, TensorFlow, PyTorch, Spacy, NLTK

Soft Skills & Leadership

Decision-Making, Team Management, Effective Communication

Development & DevOps

Python, TypeScript, NextJS, ReactJS, FastAPI, Docker, Kubernetes, Git/GitHub, Vercel

Databases

PostgreSQL, MongoDB, Maria DB, Neo4j, Vector Databases(chroma, pinecone)

Publications & Research

Large Language Models in Clinical Reasoning: Capabilities, Challenges, and the Future of AI-Assisted Healthcare , *Journal of Healthcare Informatics Research*

Bridging Performance and Efficiency: Distilling Vision Transformers for Remote Sensing, *ICODT2 - IEEE*

Certifications

- Aspire Leadership (Harvard University)
- Prompt Engineering (Deep learning.AI)
- Supervised Machine Learning: Regression and Classification
